a return link for receiving commands from the receiving station to the
CPU; and
a central processing unit (CPU) coupled to the camera memory and the
cellular telephone transmitter, the CPU being configured to control the camera memory
to produce output data representing the images formatted as one or more electronic mail
messages, the CPU further being configured to control the cellular telephone transmitter
to transmit the output data from the camera memory to the receiving station.

a digital still camera, at a remote station, which captures one or more images in digital form and stores the images in a camera memory;

a cellular telephone transmitter for communication with a receiving station;

circuitry to produce information relating to the location of the portable image transfer system;

a return link for receiving commands from the receiving station to the CPU; and

a central processing unit (CPU) coupled to the camera memory, to the circuitry, and to the cellular telephone transmitter, the CPU being configured to control the camera memory to produce output data representing a combination of the images and the location information, the CPU further being configured to control the cellular

(Amended) A portable image transfer system comprising:

## **REMARKS**

telephone transmitter to transmit the output data from the camera memory to the

Claims 1 - 24 are pending.

The offer to surrender under 37 C.F.R. §§1.172 and 1.178 filed July 19, 2001 was deemed insufficient on the ground that a signatory did not establish that he was empowered to sign on behalf of the Assignee. In response, a statement under 37 C.F.R. 3.73(b) is submitted herewith as a corrective measure.
